## Software Developer – Budapest, Hungary

### Description

Want a career in the fast-moving and dynamic world of IT Development? Fancy working in Budapest on interesting development projects with ambitious clients? Then Stellarise is for you. We are a technology business; we believe in the power of the cloud and we have big ideas. All of which makes for challenging projects that will stretch and develop those who join us. **Are you up for that challenge?**

We are Stellarise – an established leading provider of IT services and SaaS solutions supporting our customers across the UK and Europe. With offices in London and in Budapest, we are a Microsoft Silver Cloud Productivity Partner and approved Xero Developer partner. Our office in Budapest opened in August 2018 as part of our strategic plans for expansion. There is more information about us below.

We are looking for a bright, friendly, enthusiastic and ambitious software developer with excellent spoken and written English to work alongside our established Development team in both Hungary and the UK. We will be conducting initial telephone interviews followed by a 20 minutes coding test and for shortlisted candidates a face-to-face interview.

More about Stellarise:

We believe that the right technology makes growing a business simpler and we are a leading provider of IT services and SaaS solutions supporting SME's growth in the London area. You would join a team developing FinTech SaaS applications. Collectively strong and individually skilled, we take responsibility for owning and resolving challenges to the best outcome. We work hard, we explore and learn more. We enrich those around us by transferring our knowledge.

Our customers do many different things – design incredible buildings, create compelling events, find hidden oil reserves, drive website sales and raise capital for global start-ups. We ensure they stay productive and underpin their growth.

### Responsibilities

You're a bright and ambitious IT postgraduate software developer with 2-3 years experience in a similar firm. Your excellent written and spoken English communication skills will be absolutely key. In addition to your Developer skills, you will be able to build relationships with clients, listening carefully to their needs and then taking a structured and systematic approach to problem solving. Being able to effectively document and explain your solution to other team members will also be fundamental. Systematic about testing your solutions, always aiming to deliver a high-quality result – sounds like you? Get in touch!
